

TAPIS VERS

CHILI MUSTARD - BASED FERTILIZER

100%
ECOLOGICAL

→ **OLIGO-ELEMENTS BASED FERTILIZER**
(Fertilization / Phytostimulation)

→ **ANNELID ECOLOGICAL REPELLENT**
(Meloydogynes, Nématodes ...)

→ **100% DEGRADABLE BIOMOLÉCULES**
(Gas emission in the soil)

TAPIS VERS

CHILI MUSTARD - BASED FERTILIZER

100%
ECOLOGICAL

TAPIS VERS is a nutrients and oligo-elements riched fertilizer which optimizes plant growth and yield, but also plant resistance against pathogen attacks.

TAPIS VERS is a 100% ecological and biodegradable product, which respects the ecosystem.

TAPIS VERS contains mustard chili extracts, of which substances (capsaicine and glucosinolate) turn into an irritating gaz when entering in contact with water. This repels annelids such as Meloidogynes, nematods...

👉 Don't forget
to water
abundantly!

Spray TAPIS VERS
(see dosages) then WATER to make the
product penetrate into the soil

TAPIS VERS turns to gaz
when mixed with water

From 3 minutes, worms
become disturbed and
evacuate the soil

Utilisation

Spray

Traitement curatif :
20 l of TAPIS VERS in 200 l of
boiled water for 1 ha

Traitement d'entretien :
5 l of TAPIS VERS in 200 l of
boiled water for 1 ha

Après traitement:
Water following spraying
TAPIS VERS to make the
product penetrate into the soil

**Periodicity of maintenance
treatment :**
once a month

Use period :
January to December

Composition

Manganese : 1%
Fer : 1%
Algae juice (laminarines) : 1%
Chili mustard extracts : 4%

Consistent with foliar fertilizer
standards - NFU 42-003-2
Accordance with regulation
CE N°384/2007

Packing

can cardboards : 4 x 5 l

Product preservation :
0° à +35° in a can
Store in a cool, dry place, away
from direct sunlight and do not
expose to unsafe environment
