

LIMOSAIN

Organic fertilizer enriched with orange and Trichoderma extracts

100% organic

LAWNS

- Drying property of cuticles
- Help to maintain the fluidity of the sap
- Rich in Boron (essential micronutrient)

Use

- Shake well before use
- Spraying 5L/ha 1 to 2 times a week
- 10L/ha from the first insects

Composition

Natural extracts of mustard: 5%
Natural extracts of orange: 2%
Natural extracts of chilli: 0.5%
Iron chelate: 0.2%

Packaging

- 1L bottles
- 5L Cans
- 20L Cans
- Storage: 1 year in a cool and dry place protected from the light

Complies with the standards for foliar fertilisers -NFU 42-003-2 Complies with EC Regulation N° 384/2007

LIMOSAIN

Organic fertilizer enriched with orange and Trichoderma extracts

LIMOSAIN is a foliar fertilizer. In addition, its composition acts on both the insect shell and their respiratory and digestive systems. This product is therefore suitable for application in contact with the insect pest. Apply in the evening when the flowers are closed, to avoid collateral damage on bees. Harvest is possible the next morning. Its formula makes the leaves more vigorous to resume photosynthesis despite the attacks of pests.

Its formula based on purified orange extracts and *Trichoderma harzianum* has revealed a drying action on the shells following a dehydration of the cuticle.

In addition, **LIMOSAIN** optimizes plant nutrition by providing boron, a beneficial nutrient that acts on cell division. The innovative formula of **LIMOSAIN** creates special conditions that promote boron absorption by the plant

➤ Promotes the recovery of photosynthesis despite attacks by pests:

➤ Standard program:

Limosain 5L/ha 1 to 2 times per week

Limosain 10/ha to the first insect pest
